

BAC - Cutting Blade

Bonded Acoustical Cotton Blade For Field Cutting of Echo Eliminator™ (BAC) Panels

Echo Eliminator panels are made from BAC, bonded acoustical cotton, and do not cut easily with standard tools. Acoustical Surfaces offers this specialized blade that fits a standard table saw that allows on-site alterations to the materials. This ensures the material can be easily manipulated to fit a project, with minimal damage to the product itself. If you are thinking of utilizing Echo Eliminator, don't work without the BAC cutting blade.

FEATURES & BENEFITS

- Easily cuts Echo Eliminator Panels
- Fits standard table saw
- Fits some skill saws
- Provides near factory edge

MATERIAL

Steel.

FEATURES

Easily cuts Echo Eliminator Panels for a factory looking edge.

APPLICATIONS

This blade allows for easy straight line cuts - not intended to cut curved lines. The BAC Blade is the easiest way that we have found to field cut Echo Eliminator panels.

SIZE

Diameter of blade: 8" round.
