CLIMATE SEAL™ WINDOWS

Sound Reducing Window Insert Maintenance

WASHING:

While the Flexible Climate Seal™ Interior Magnetic Insulating Window System can be washed with mild soap or dishwashing liquid mixed with lukewarm water, it is strongly recommended that anti-static cleaner/polish solutions be used. ASI exclusively features Brillianize Cleaner®. We believe it to be the best cleaner available. It is an anti-static cleaner/polish, which will prevent electrostatic charge, and will leave the surface with a brilliant shine, while resisting finger marking and repelling dust. And every time you polish your Climate Seal™ you will also build up an invisible layer of protection against potential scratching. This is not to say that you need to have separate cleaners for your primary window's glass and the Climate Seal's™ acrylic. Brillianize cleaner is highly recommended for all shiny hard reflective services except for flooring. Please view the supplies below for a more detailed description of our accessories. Use a soft cloth or chamois (we recommend WypAll®) and as much solution as possible. It is recommended that you wipe in a vertical and horizontal direction. Try not to wipe in a circular motion, because should there be any grit on the acrylic, you will be running it over the surface many times. Always wipe and polish until completely dry and the surface feels as 'smooth as ice'. **DO NOT** use paper towels because they are naturally abrasive. **DO NOT** use ammonia based cleaning fluids (such as WINDEX), scouring compounds, gritty cloths, leaded or ethyl gasoline, or strong solvents such as alcohol, acetone, carbon tetrachloride, etc. To remove minor scratches apply a thin coat of a good grade of automobile paste wax (not a cleaner/wax combination) with a soft, clean cloth to protect the surface of the acrylic sheet and maintain its luster. To remove grease, tar or paint, use good quality naphtha.

STORING:

It is preferable that the windows be inserted in poly bags and stored horizontally on their side. This helps prevent scratching from dirt particles that may be present on the surface when the windows are stored flat. In storing horizontally on its side you ensure the Climate Seal™ window will maintain its original shape, as it is a flexible product.

ADDITIONAL NOTE:

There is no need to store the Flexible Climate Seal™ Interior Magnetic Insulating Window if the primary window is not going to be used for ventilation. The Flexible Climate Seal™ Interior Magnetic Insulating Window saves energy in the summer by reducing heat gain, which lowers air conditioning costs.

SUPPLIES AND ACCESSORIES:

These are supplies that ASI highly recommends and resells.

32 oz. Trigger Spray Bottle

BRILLIANIZE:

Highly Recommended for Cleaning and Polishing Plexiglass Lexan Acrylite and Lucite Plastics, or any hard shiny non-absorbent surface.

1. ANTI-STATIC

Surface repels dust.

2. INVISIBLE

- Cleans & glazes in one operation.
- Resists scratching.
- Resists finger marks.

3. EASY TO USE

Shake container, spray on surface, rub briskly with soft cloth. Polish until surface is brilliant. Do not use on surfaces to be painted.

4. ENVIRONMENTALLY SAFE

Not toxic & non-hazardous to people & the environment. No strong odors or vapors. Non-flammable.

5. ALL PURPOSE POLISH:

Brilliance cleaner & polish makes shiny surfaces dazzle by safely imparting a clean, brilliant glaze onto non-porous materials.

Gallon Refill Jug

WYPALL L30® ECONOMIZER WIPERS...

are specifically designed to replace airlaid wipers, which have 'pool-prone' pore areas. They are ideal for a variety of light-duty maintenance, processing and janitorial wiping tasks.

Features:

- Non-Abrasive
- Re-Usable
- Lint-Free
